DETAILED ACTION

Page 2

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the three layers of the inner shaft must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8,12-13,17-18,20-21, 24-25 and 33-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Danforth (USPN 4,822,345). Danforth discloses a catheter (20), an inner shaft (53) and an outer shaft (42) and a heat transmitting mechanism (lumen 56). The assembly also has a balloon (28). It is considered inherent that any portion of the external surface of any balloon defines a stent mounting region. See 6:53-66.

Danforth meets the claim limitations as described above but fails to include an inner shaft having three layers.

Samuelson et al (USPN 6,464,683) teaches a catheter with an inner shaft having three layers for improved advancement of a separate smaller catheter through the lumen. See 6:25-28.

At the time of the invention, it would have been obvious by one skilled in the art to incorporate the three layer coating construction of Samuelson into the invention of Danforth. Both devices are analogous in the art; therefore, a combination is proper. Additionally, the motivation for making the combination comes from both Danforth and Samuelson. Danforth teaches introducing a catheter through inner lumen 47 and Samuelson teaches a mechanism (layered coating) for enhancing the advancement of the catheter. The motivation would have been in order to enhance the advancement of the angioplasty catheter of Danforth.

Art Unit: 3763

Allowable Subject Matter

Claims 22-23 are objected to as being dependent upon a rejected base claim, but would

be allowable if rewritten in independent form including all of the limitations of the base claim

and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Catherine S. Williams whose telephone number is 571-272-4970.

The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nicholas D. Lucchesi can be reached on 571-272-4977. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
